GRIMSBY DOCK

RIVER HUMBER

www.abpnotify.co.uk

Under UK legislation in line with an EC directive the MS (Port Waste Reception Facilities) Regulations 2003, and as amended makes it a requirement that vessels notify their next port of call of the types and amount they will be discharging. Information must be given at least 24 hours in advance of arrival or as soon as they leave their last port.

5 SIMPLE STEPS TO ONLINE PRIOR WASTE NOTIFICATION

Step 1 The agent on behalf of the vessel will order the vessel in via Agents on Line system. The waste declaration form is available through Agents on Line. Alternatively the Master (or Agent on his behalf) can logs onto www.abpnotify.co.uk; select the correct port and fill the information.

Step 2 The Agent or Master will fill in the information requested.

Step 3 Click on 'submit' at the end of the prior notification form to send information to the computer server. When the system receives the data, it automatically generates a PDF version of the prior notification form and sends a copy on to the relevant ABP port and back to the email address of the person who submitted the information.

Step 4 The Master/Agent saves and prints the returned PDF version of the notification form and files it for their records. The Deputy Dock Master does the same.

Step 5 Exit site.
